

Curriculum Vitae

Angel E. Alsina, M.D., FACS, FAASLD
Collaborative Professor of Surgery

812 S. Poinsettia Dr
Tampa, FL 33609
Telephone: (813) 663-5220, direct
e-mail: angel@alsinaliverconsulting.com
Website: www.alsinaliverconsulting.com

Highly respected liver surgeon with 24 years of liver transplant experience at a tertiary care, 1,010 bed teaching hospital. Trained at the Harvard Department of Surgery, New England Deaconess Hospital in Hepato-Biliary Surgery and Liver Transplantation, and St. Elizabeth's Medical Center, in Boston, MA.

American Board of Surgery certified. Fellow of the American Association for the Study of Liver Diseases and Fellow of the American College of Surgeons. Collaborative Professor at the University of South Florida, Morsani College of Medicine.

Broad knowledge in various fields: general Surgery, liver surgery, transplantation, hepatology (hepatitis C, drug-induced injuries and liver disorders), and hepato-oncology (liver cancer). Directed liver transplantation and liver cancer programs for a total of 20 years.

Proven track record: His liver transplant program performed at the 96th percentile in long term outcomes, nationally, from 130 transplant programs. His patients had 38% lower risk of death than the average program. He also outperformed every higher volume program in patient survival. Evaluated over 5,000 new liver cancer patients.

Principal investigator and researcher in 27 pivotal trials of liver transplantation, acute liver failure, fatty liver, hepatitis C, and liver cancer. Published in topics of acute liver failure, liver cancer, liver transplantation, cirrhosis and portal hypertension, ethnic and ethical aspects of transplantation, and liver oncology. Expert CME teacher nationally with Simply Speaking Hepatitis panel, advisor, research mentor, and speaking experience nationally and internationally.

Experienced medico-legal expert witness and consultant in surgical complications, hepatology, liver transplantation, liver oncology (cancer), bile duct injuries, drug-induced liver injuries, Correctional Medicine in liver disorders and Hepatitis C treatment in inmates, life expectancy in liver disease, and disability for transplant surgeons.

Professional Practice: Tampa General Medical Group, Tampa, FL
Multi-Organ Transplant Surgeon
HepatoBiliary Surgery and Liver Transplantation: October 2011 to May 2020.
Director Liver Cancer Program, Tampa General Hospital, 2007 to 2019

Multi-Organ Transplant Surgeon, LifeLink HealthCare Institute.
July 1996 to October 2011

Director, Liver Transplantation, LifeLink HealthCare Institute/
Tampa General Hospital 2007-2018
Assoc. Director 2002-2006.
Interim Director 1999-2001

Education:

Fellowship:

New England Deaconess Hospital, Boston, MA, Harvard Department of Surgery;
ASTS Approved Fellowship in Transplantation and Hepatobiliary Surgery July,
1994 to June, 1996.

Hartford Hospital, Hartford, CT.
Department of Surgery; Univ. of Connecticut School of Medicine,
Clinical and Research Fellowship in Organ Transplantation.
July 1989 - June, 1991.

Residency: St. Elizabeth' s Medical Center of Boston, Boston, MA
Surgery Residency. July, 1987 - June 1989, and July 1992 - June, 1994.
Chief Surgical Resident. July, 1993 - June, 1994.

Nassau County Medical Center, East Meadow, NY
Surgery Residency. July, 1991 - June, 1992.

Graduate: Ponce School of Medicine, Ponce, Puerto Rico
Doctor in Medicine. 1983 - 1987.

Undergraduate: Boston College, Chestnut Hill, MA
BS, Major in Biology. 1979 - 1983.

Academic Appointments Collaborative Professor of Surgery, University of South Florida Morsani College
of Medicine, 2018

Affiliate Associate Professor of Surgery, University of South Florida Morsani
College of Medicine, 2009

Affiliate Associate Professor of Medicine, University of Puerto Rico, Medical Sciences Campus, 2009

Affiliate Assistant Professor of Medicine, University of Puerto Rico, 2002.

Affiliate Assistant Professor of Surgery, University of South Florida College of Medicine, 1996.

Clinical Fellow in Surgery, Harvard Medical School, 1994.

Clinical Fellow in Surgery, Tufts University School of Medicine, 1988.

Hospital appointments: Tampa General Hospital, Active Staff, 1996 - present

Licensure: Florida - No. ME 0071238; 1996 to present.
Puerto Rico-No. 14019; 2001-2013

Certifications: American Board of Surgery - 1995. Recertified 2005 and 2013

Clinical Practice Innovations

In 2019, I introduced robotic surgery capabilities at Tampa General Medical Group, the only surgeon qualified in the group.

I developed the Liver Cancer Program in 2010 and Sub Specialty clinic for hepatocellular carcinoma in 2012. Upgraded multi-disciplinary tumor conference, created program requirements for liver cancer program, expanded clinic, established chemotherapy treatments and obtained Tumor Board designation for liver cancer at the Cancer Committee and brought several clinical trials in hepatocellular carcinoma to my institution.

In 1999, I began a collaborative effort with the University of Puerto Rico and the Department of Health in Puerto Rico to assist with an undeserved population of liver transplant candidates that had limited access to life-saving treatments. This satellite clinic with the Division of Gastroenterology at UPR continued until 2012, at which point the local program opened.

Honors: At Ponce School of Medicine: Emergency Medicine, Internal Medicine, Surgery, Primary Care, Urology, Psychiatry, Microbiology, Medical Ethics, Clinical Medicine, Family and Community Medicine and Biostatistics.

Awards: Compassionate Doctor Award - 5 Year Honoree (2014, 2016, 2018). Vitals

Compassionate Doctor Award - 5 Year Honoree recognizes doctors with the highest scores in bedside manner for five consecutive years.

Compassionate Doctor Recognition (2010, 2011, 2012, 2013, 2014, 2015, 2016, 2018). Compassionate Doctor certification is granted to physicians who treat their patients with the utmost kindness. The honor is granted based on a physician's overall and bedside manner scores.

On-Time Doctor Award (2014, 2015, 2016, 2018). Vitals On-Time Promptness Award recognizes doctors with consistent high ratings for timeliness of appointments

Patients' Choice 5th Anniversary Award (2012, 2013, 2014, 2016, 2018)
The Patients' Choice Award - 5 Year Honoree is a recognition granted only to those doctors whose ratings have reflected excellence in care for five years in a row. Only 1% of all doctors in the United States are bestowed this honor by their patients.

Patients' Choice Award (2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2018). Patients' Choice recognition reflects the difference a particular physician has made in the lives of his/her patients. The honor is bestowed to physicians who have received near perfect scores, as voted by patients

Castle Connolly Regional Top Doctors: 1st Edition. Tampa Bay Magazine: Top Doctors: 2018.

Top 10 Doctor - City (2014). Vitals awards Top 10 Doctor honors to those physicians within a certain specialty and geographic area who are consistently given top ratings by their patients.

Tampa Top Doctors 2020, *Tampa Magazine*

Ludwig J. Pyrtek, M.D. award for best manuscript in Hartford Hospital among resident and fellows, May, 1991. Alsina A, Schweizer R., Successful orthotopic porcine small bowel transplantation with low dose Cyclosporine in triple immunosuppressive therapy.

Chairman of the Board Award LifeLink Foundation, 2000.

American Liver Foundation, Gulf Coast Chapter Award 2005

Clinical Trials:

A. At LifeLink HealthCare Institute, as Co-Investigator:

1. Prograf as secondary intervention vs continuation of cyclosporine in patients at risk for chronic renal allograft failure. #20-98-002, Fujisawa.

2. Open label study of Neoral as primary immunosuppressant in transplant patients who are unable to maintain satisfactory immunosuppression on Prograf. #OLN-452, Novartis.
3. A 6 day, open label, pharmacokinetic bioavailability evaluation of mycophenolic acid when switching from intravenous mycophenolate mofetil to oral mycophenolate mofetil in renal transplant recipients in the immediate post-op period. # MYLC 2734. Roche.
4. A double blind, comparative study of the effect of low dose levels of sirolimus versus azathioprine, administered concomitantly with standard immunosuppression therapy in renal allograft recipients. # 0468E1-301-US, Wyeth-Ayerst.
5. A phase III, randomized, double blind, placebo controlled, multicenter study of the efficacy of odulimomab (antiLFA) in preventing delayed graft function (DGF) of cadaveric renal allografts in patients not receiving biological induction immunosuppressive therapy. # AFO 12396. IMTIX.
6. A randomized, open label, pilot study of cyclosporine elimination in renal allograft recipients treated with sirolimus, cyclosporine and corticosteroids in the early post-operative period. # 0468 E1-212-US. Wyeth Ayerst.
7. A randomized, double blinded, double dummy, active-comparative controlled multi-center study of the efficiency and safety of Valgancyclovir (R0101-9070) vs oral gancyclovir for prevention of cytomegalovirus disease in high risk heart, liver and kidney allograft recipients.
8. An open label, prospective, randomized, multi-center, Phase II comparative trial of Thymoglobulin vs Simulect for the prevention of delayed graft function and acute allograft rejection in renal allograft recipients.
9. A randomized, open label, comparative evaluation of conversion from calcineurin inhibitors to Sirolimus versus continued use of calcineurin inhibitors in renal allograft recipients. # 0468 H1-316-US. Wyeth-Ayerst.
10. A 1 year multicenter, randomized, open label, parallel group study of the safety, tolerability and efficacy of two doses (1.5 and 3 mg/day) of Certican™.(RAD 001) with Simulect® corticosteroids and optimized administration of Neoral® in de novo renal transplant recipients. CRAD001A2307. Novartis.
11. A prospective, randomized, open label, twenty-six week study of the efficacy and safety of converting kidney and liver transplant recipients with Tacrolimus associated abnormal glucose metabolism to Neoral with C₂ monitoring. Novartis COLO 400 A US 06.
12. An Open-Label, Concentration-Controlled, Randomized, 12-Month Study of Prograf + Rapamune + Corticosteroids Compared to Cyclosporine USF (Modified) + Rapamune + Corticosteroids in High Risk Renal Allograft Recipients

13. A prospective, randomized, open-label, twenty-six week study of the efficacy and safety of converting kidney and liver transplant recipients with tacrolimus-associated abnormal glucose metabolism to Neoral® with C2 monitoring.
14. A Randomized, Multicenter, Comparative Trial of Prograf (Tacrolimus) in Combination With Rapamune (Sirolimus) or CellCept (Mycophenolate Mofetil) After Kidney Transplantation
15. Randomized, Double-Blind, Comparative Study of Two Doses of Mycophenolate or Azathioprine Each in Combination with Cyclosporine and Corticosteroids for the Prevention of Rejection in Recipients of their First Cadaveric Renal Allograft.
16. A phase IV, randomized, open-label, comparative, multicenter, study to assess the safety and efficacy of induction agents Alemtuzumab (Campath), Basiliximab (Simulect) or Rabbit Anti-Thymocyte Globulin (Thymoglobulin) in combination with Tacrolimus (Prograf), Mycophenolate Mofetil (CellCept) and a rapid steroid withdrawal in renal transplant recipients.
17. An open label; prospective, randomized, controlled, multi-center study assessing fixed dose vs. concentration controlled CellCept® regimens for patients following a single organ renal transplantation in combination with full dose and reduced dose calcineurin inhibitors.
18. A prospective, randomized, open-label, twenty-six week study of the efficacy and safety of converting kidney and liver transplant recipients with tacrolimus-associated abnormal glucose metabolism to Neoral® with C2 monitoring
19. Reduction of PRA (Panel Reactive Antibody) in Sensitized Patients Awaiting Live-Donor Renal Transplantation.2002-present
20. A phase IIB, randomized, multicenter, open-label, concentration controlled, safety study of ISA247 and Tacrolimus in de novo renal transplant patients
21. A Controlled, Randomized, Prospective, Double-Blind, Multicenter, Phase I/II, Intravenous, Single Ascending Dose Study of the Safety, Pharmacokinetics, and Efficacy of YPSL for Prevention of Delayed Graft Function in Patients Undergoing Cadaveric Kidney Transplantation
22. A one-year, multicenter, partially blinded, double-dummy, randomized study to evaluate the efficacy and safety of FTY720 combined with reduced-dose or full-dose Neoral® and corticosteroids versus mycophenolate mofetil (MMF, CellCept®) combined with full-dose Neoral® and corticosteroids, in de novo adult renal transplant recipients
23. A Randomized, Open-Label Preference Study of Gengraf™ Compared to Neoral in Stable Solid-Organ Transplant Subjects
24. A Twelve-Month, Randomized, Multicenter, Open-Label Study to Investigate the Clinical Outcomes of Two Immunosuppressive Regimens of Myfortic with Short-Term Steroid Use or Free of Steroids Compared with a Regimen of Myfortic with Standard Steroids in De Novo Kidney Recipients Receiving Simulect and Neoral

25. A one-year, multicenter, open-label, randomized study to evaluate the safety and the efficacy of FTY720 combined with tacrolimus and steroids vs. MMF (Cellcept®) combined with tacrolimus and steroids, in de novo adult renal transplant recipients

26. A Randomized, Double-Blind, Placebo Controlled Multi-Center Study of the Efficacy and Safety of up to 100 days of Valganciclovir vs. up to 200 days of Valganciclovir for Prevention of Cytomegalovirus Disease in High-Risk Kidney Allograft Recipients.

27. A Phase IIb, randomized, open label, comparative, multi-center study to assess the safety and efficiency of Prograf vs. modified release Tacrolimus (MR) with CellCept and should withdrawal in de Novo Liver Transplant recipients (20-05-001, Astellas Pharma US, Inc).

28. Belatacept evaluation of Nephro protection and efficiency of first line immunosuppression trial in extended criteria donors (Benefit-Ext). (IM103027, BMS.)

29. A Phase I /II multi-center, randomized, double blind, placebo-controlled, pilot trial to assess the effect of treatment of the recipient vein of polytetrafluoroethylene (PTFE) vascular access graft with two concentrations of E2F Decoy as compared to placebo on neointimal hyperplasia and the preservation of graft function in patients with chronic renal failure requiring dialysis. 2002-2004

As Principal Investigator

2003-2005

30. A randomized, open label, comparative evaluation of conversion from calcineurin inhibitor treatment to Sirolimus treatment vs. continued calcineurin inhibitor treatment in liver allograft recipients undergoing maintenance therapy. (Wyeth 0468H1-313-US)

31. A prospective, open label, multi-centers, randomized trial of the efficacy and safety of a long term calcineurin inhibitor free maintenance regimen with Mycophenolate Mofetil and sirolimus in recipients of an orthotopic liver transplant. (Roche Liver STN-ML 18423) 2006-2008

32. A Randomized, double blind, double dummy study to assess the efficiency and safety of prophylactic use of Maribavir versus oral Gancyclovir for the prevention of cytomegalovirus disease in recipients of orthotopic liver transplants. Maribavir/Protocol 1263-301 Viropharma, Inc.) 2007

33. Evaluation of Belatacept as first line immunosuppressant in de-novo liver transplant recipients (BMS, IM 103045) 2008

34. Everolimus Liver Trial: A 24 month, multicenter, open label, randomized, controlled study to evaluate the efficiency and safety of concentration-controlled everolimus to eliminate or reduce tacrolimus in de-novo liver transplant recipients (RAD 001, Novartis) 2008

35. A phase 2, open label, multicenter, randomized trial to demonstrate the pharmacokinetics of LCP Tacro tablets once daily and Prograf capsules twice daily in adult de novo liver transplant patients. (LCP-Tacro 2018, LifeCycles Pharma) 2008

2009

36. A phase 2 randomized, multicenter, placebo-controlled, double-blind, parallel group study to evaluate the efficacy, safety and population pharmacokinetics of once-daily oral E5501 tablets used up to seven days in subjects with chronic liver diseases and thrombocytopenia prior to elective surgical procedures or diagnostic procedures (Eisai)

B. At Tampa General Medical Group, as Coinvestigator:

37. A 2-Part, Open Label Study of Telaprevir in Combination With Peginterferon Alfa-2a (Pegasys R) and Ribavirin (Copegus –R) in Subjects Chronically Infected with Genotype 1 Hepatitis C Virus Following Liver Transplantation (Vertex, VX 11-950-117) 2011

38. A Non-Interventional, Prospective, Cohort Study of the Effectiveness, Safety, and Utilization of Two Approved Pegylated Interferon-Based Direct Acting Antiviral Triple Therapies in the Management of Genotype 1 Chronic Hepatitis C in Routine Clinical Practice in the USA (Roche ML 279000)

39. A Phase 3, Safety and Efficacy Study of Short Duration boceprevir/Peginterferon Alfa-2a/ribavirin in Chronic Hepatitis C Genotype 1 IL28B CC Patients (Merck 3034-040-00)

40. A Multicenter, Randomized, Double-blind, Placebo-Controlled, Phase 2B Study to Compare the Efficacy and Safety of Quadruple Therapy (VX-222, Telaprevir, Peginterferon-Alfa 2, Ribavirin) to Triple Therapy (with VX-222-Placebo) in Subjects with Genotype 1 Chronic Hepatitis C with Compensated Cirrhosis. (Vertex VX 11-222-106)

41. Hi Q Quadraspheres Chemoembolization Trial in Hepatocellular Carcinoma

42. Optimal Boceprevir in community practice: Assessing Safety, Efficacy, Compliance and Quality of Life, Impact of an Educational Program

43. Vertex 116 An Open-Label, Phase 4 Study of Telaprevir, Peginterferon Alfa-2a (Pegasys®), and Ribavirin (Copegus®) in Treatment-Experienced Black/African American and Non-Black/African American Subjects With Genotype 1 Chronic Hepatitis C Who Have Not Achieved Sustained Viral Response With Prior Course of Interferon-Based Therapy

44. A randomized, open-label, multicenter, controlled study to assess the safety and efficacy of ELAD in subjects with acute alcoholic hepatitis. Vital Therapies. 2013.

45. A Randomized, Double-Blind, Placebo-Controlled, Dose-Ranging, Multicenter Study to Assess the Efficacy and Safety of Rifaximin Soluble Solid Dispersion (SSD) Tablets for the Prevention of Complications in Subjects with Compensated Liver Cirrhosis.

46. Quality of Life and Nutritional Improvements in Cirrhotic Patients Following Hepatic Encephalopathy using Rifaximin

47. A 5-year, longitudinal observational study of the natural history and management of patients with hepatocellular carcinoma. Target PharmaSolutions, TARGET-HCC. 2018

As Principal Investigator:

2011- 2020

47. Multicenter, Randomized Pilot Study of the Effect of Sorafenib Dosing Schedule on Tolerability and Drug Delivery (Bayer ONC 2010-19)

48. A Phase 2b, Dose-Ranging, Randomized, Double-Blind, Placebo-Controlled Trial Evaluating the Safety and Efficacy of GS- Secondary to NASH (Gilead GS-US-321-0105)

49. A Phase 2b, Dose-Ranging, Randomized, Double-Blind, Placebo-Controlled Trial Evaluating the Safety and Efficacy of GS-6624, a Monoclonal Antibody Against Lysyl Oxidase-Like 2(LOXL), in Subjects with Cirrhosis Secondary to 6624, a Monoclonal Antibody Against Lysyl Oxidase-Like 2(LOXL), in Subjects with Advanced Liver Fibrosis but not Cirrhosis NASH (Gilead GS-US-321-0106)

50. A long term follow up registry of subjects who achieve a sustained virologic response to treatment in Gilead- sponsored trials in subjects with chronic hepatitis C infection. (Gilead GS-US-248-0122)

51. A long term follow up registry of subjects who did not achieve a sustained virologic response to treatment in Gilead- sponsored trials in subjects with chronic hepatitis C infection. (Gilead GS-US-248-0123)

52. A phase 2, multicenter, randomized, partially blind, dose ranging study to evaluate the efficacy and safety of VX-135 and Daclatasvir with or without ribavirin for 12 weeks in treatment-naïve adult subjects with genotypes 1, 2, or 3 chronic hepatitis C virus (Vertex 13-135-106)

53. Sorafenib adjuvant high risk liver transplants with HCC (ONC 2011-31)

54. Phase 2 Placebo-controlled, double-blind trial of dasatinib added to Gemcitabine for subjects with locally advanced pancreatic cancer. Otsuka 287-11-201

55. A randomized, open-label, multicenter, controlled study to assess the safety and efficacy of ELAD in subjects with acute alcoholic hepatitis. Vital Therapies. 2013.

56. A randomized, open-label, multicenter, controlled study to assess the safety and efficacy of ELAD in subjects with acute fulminant hepatic failure. Vital Therapies. 2013.

57. A Phase 2b, Dose-Ranging, Randomized, Double-Blind, Placebo-Controlled Trial Evaluating the Safety and Efficacy of GS-6624, a Monoclonal Antibody Against Lysyl Oxidase-Like 2(LOXL), in Subjects with Advanced Liver Fibrosis but not Cirrhosis Secondary to NASH (Gilead GS-US-321-0105)

58. A Phase 2b, Dose-Ranging, Randomized, Double-Blind, Placebo-Controlled Trial Evaluating the Safety and Efficacy of GS-6624, a Monoclonal Antibody Against Lysyl Oxidase-Like 2(LOXL), in Subjects with Cirrhosis Secondary to NASH (Gilead GS-US-321-0106)

59. A Multicenter, Randomized, Open-Label, Phase 3 Trial to Compare the Efficacy and Safety of Lenvatinib (E7080) Versus Sorafenib in First-Line Treatment of Subjects with Unresectable Hepatocellular Carcinoma, Eisai E7080-G000-304

60. A randomized, double blind, placebo-controlled, multicenter phase III study of regorafenib (BAY 73-4506) in patients with hepatocellular carcinoma (HCC) after sorafenib. Bayer 15982.

61. Topotinib second line therapy in hepatocellular carcinoma. EMD Serono 20095. 2016

62. A multicenter, single arm, Phase 1b/II study to evaluate the efficacy, safety, and PK of MSC2156119J as monotherapy in subjects with MET+ advanced hepatocellular carcinoma with Child Pugh class A liver function who have failed sorafenib. EMR 200095-005. 2016

63. A Phase 3 Multicenter, randomized, double-blinded, active-controlled, clinical study to evaluate the safety and efficacy of lenvatinib in combination with pembrolizumab versus lenvatinib in first line therapy of participants with advanced hepatocellular carcinoma (Merck Leap 002)

64. Safety and Efficacy of Lenvatinib (E7080/MK-7902) With Pembrolizumab (MK-3475) in Combination With Transarterial Chemoembolization (TACE) in Participants with Incurable/Non-metastatic hepatocellular Carcinoma (MK-7902-012/E7080-G000-318/LEAP-012).
